

Interagency Contract Directory

Introduction

The Interagency Contract Directory is a searchable database that can be used to identify indefinite delivery vehicles (IDV), including blanket purchase agreements (BPAs), which are available for use by either components within an agency or agencies outside of the awarding agency. These vehicles are contracts that can be used by Federal Agencies by placing orders against them.

The ICD offers Google like search capability and intuitive drill down options enabling the user to find desirable contracts with great ease. The ICD is designed to be efficient by delivering fast and accurate results. The ICD searches FPDS-NG data entered up through the previous day and returns results meeting the search criteria. DOD contract that is reported within the last 90 days will not be included in the results. All contracts returned are in Final status.

Supported Browsers: Chrome, Firefox, and IE 8 onwards.

ICD can be accessed at www.contractdirectory.gov.

The screenshot shows the homepage of the Interagency Contract Directory. At the top, there is a green header with the title "Interagency Contract Directory" and a seal on the left. Below the header, there is a section titled "About ICD" which provides a brief description of the directory and lists various contract types. A search bar is located below the "About ICD" section, with a "Search" button, a "Clear" button, and an "Advanced Search" button. At the bottom of the page, there is a "List of GWACs" section with a list of links to various contract types, and a "GSA" logo on the right.

- The options for Advanced Search are:
 - Vendor type (Socio Economic Data or CO's determination of Business Size)
 - Product or Service Code and Description
 - Program Acronym
 - Fee for Use of Vehicle
 - IDV Type
 - Who Can Use
 - Departments awarding the Vehicles
 - Type of Cost or Pricing of the Contract

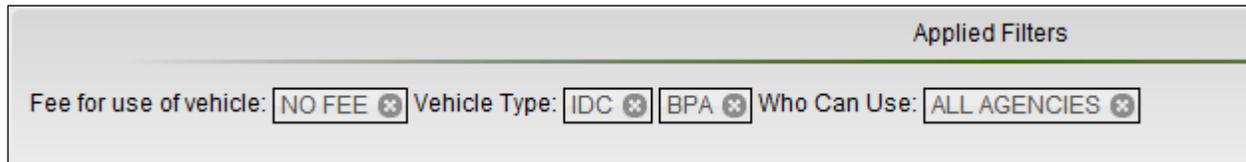

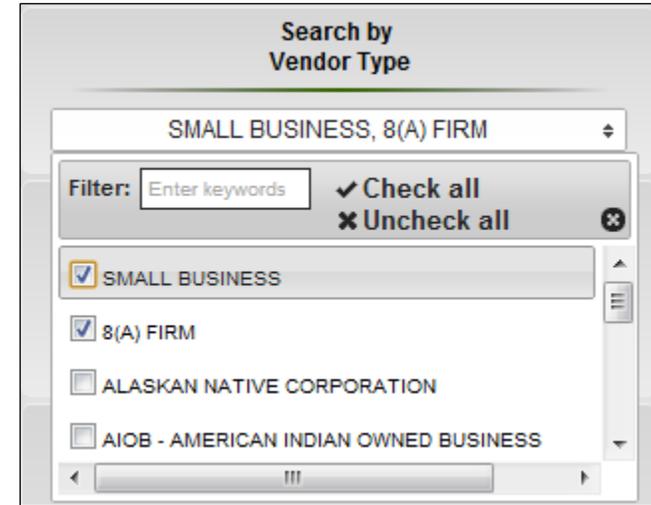

- You can see the counts of vehicles for each of the filters except Vendor type when you mouse over.

- You can select the values for any of these filters, each of which has a consolidated list of all possible values.

- Vendor type, Product or Service Code and Program Acronyms have dropdowns which can be searched and multiple values can be selected as shown.
- The filters Fee Paid for Use of Vehicle, IDV Type, Who Can Use, Department of Service Providers and Type of Cost or Pricing are radio buttons and checkboxes which can be selected.
- Once you select all your criteria, click on  button.
- All the filters you selected will be applied and shown in the Applied Filters section

Note: For the multiple values within the same filter, results matching both values will be returned. For e.g. The search results return all vehicles which are IDCs or are BPAs.

- If a filter is applied, the options for the filters are refreshed with the new count and options limiting the chances of user getting zero results

- The Search criteria can be deleted from the Search criteria by using the  button.
